

Clark Forklift Parts

Clark Forklift Part - Presently, there are at least 350,000 Clark forklifts performing worldwide, and more than 250,000 in commission in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive makes of forklifts, with components covering more than 120,000 particular components for all of its automated equipment. Your regional Clark Seller is your total source for availability of all your components needs provided by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently situated in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very outstanding international support network. With over 550 locations globally, seller representation in over 80 nations and 230 locations in North America, their high level of commitment to their clients predominates the material handling industry.

Clark proudly remains an innovative leader of the material handling industry, pioneering protection features such as the operator restraint system. This exceptional commitment to safety is at this time a customary feature on every lift truck.

Clark has a unrelenting mission to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its production facilities. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a prevailing industry position.

Clark has preferred the very economical and advantageous system of "Lean Production" for its assembly plants and use of resources. This structure was established to acknowledge the most efficient approaches of production facility stewardship and ensuring maximum proficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working together, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing costs. The new value engineering program combines innovative product development and delivers improved customer support and service within the industry.
