

Advance-Nilfisk Part

Advance-Nilfisk Part - Imagine how tedious it would really be to tidy up your very own house right after having a big party, without help from cleaning equipment. Back in the day, the time carpets and upholstery had the dirt beat out of them by hand; brushes, brooms and cleaning cloths were the leading cleaning supplies back then.

The man who founded Nilfisk-Advance, P.A. Fisker, started out as an electrical engineer who liked to work on electrical motors. After establishing his company in 1906, he began to make motors to drive coffee grinders, fans, machine tools and drills. Mr. Fisker's dream from the start was to have an international company marketing merchandise globally.

The Nilfisk C1 was an incredible breakthrough for the cleaning trade. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed just 17.5 kilos and could be operated by a single person. This invention came in a time where other cleaning equipment were very big and required at least 4 operators, therefore, the Nilfisk C1 transformed everything and developed the method we clean forever. The brain behind these very first cleaning machines remains unparalleled. Cleaning equipment offer a brilliant solution to an existing problem; things get dirty and should be cleaned on a regular basis, without a lot of effort.

Gradually but progressively, Nilfisk-Advance developed all through the years. During the nineteen eighties, this development really took place when the business became a part of the NKT Group. Their new owners' determination and concentration made Nilfisk-Advance take a huge leap ahead within the business, trying to be among the largest international players in the market of professional cleaning machines. Nilfisk-Advance is currently located in all parts of the world due to gradually obtaining many small companies to be able to expand their product portfolio and presence in new markets. They are really proud to offer a variety of cleaning solutions to meet each and every need.
